### What are the risks of investing?

Risk indicator for the Clarity Diversified Growth Fund<sup>1</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 30 June 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

3. As the Fund has not existed for a full financial year, this example is based on returns for the period 3 April 2017 to 30 June 2017.
4. As at 30 June 2017, the Fund has 45.9% of assets invested in International equities. Of this exposure, we have 24.8% of these overseas dollar denominated assets hedged.
5. The target Investment mix shown is as at 30 June 2017. Subsequently the SIPO has been updated with minor changes to the target asset allocation and percentage range. See the new Clarity SIPO dated 24 July 2017 for further information.
