

CLARITY DIVERSIFIED GROWTH FUND

What is the purpose of this update?

This document tells you how the Clarity Diversified Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Clarity Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Fund aims to achieve returns over the medium to long term by investing in a range of growth orientated securities. The Fund may invest in managed funds (including the Clarity Trans-Tasman and Clarity Global Shares Funds) and directly held shares across global markets. It may also invest in other assets on listed sharemarkets.

Total value of the fund	\$ 4,201,250
The date the fund started	03 April 2017

What are the risks of investing?

Risk indicator for the Clarity Diversified Growth Fund¹:

Lower expected returns Higher expected returns

Lower risk

Higher risk

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 30 June 2018. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	14.12%
Annual return (after deductions for charges but before tax)	14.84%
Market index annual return (reflects no deductions for charges and tax)	17.08%

We calculate the market index annual return by using 25% of the NZX50 Portfolio Index, 25% of the ASX200 Accumulation Index in NZ dollars and 50% MSCI All Country World ex-Tobacco Index (net dividends reinvested), measured in NZ dollars, 50% hedged to NZ dollars. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose.

What fees are investors charged?

Investors in the Clarity Diversified Growth Fund are charged fund charges. In the year to 31 March 2018 these were:

	% of net asset value
Total Fund Charges (incl GST)	1.01%
Comprising management and administration charges which are made up of:	
Manager's basic fee	0.66%
Other management and administration charges	0.35%

There are no performance fees charged in relation to the Clarity Diversified Growth Fund.

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Sarah had \$100,000 in the Clarity Diversified Growth at the start of the year and did not make any further contributions. At the end of the year Sarah received a return after fund charges were deducted of \$14,840 (that is 14.84% of her initial \$100,000). Sarah does not pay any other charges. This gives Sarah a total return after tax of \$14,120 for the period.

Further information

You can also obtain this information, the PDS for the Clarity Funds, and some additional information from the offer register at www.business.govt.nz/disclose.

Notes

1. As the Fund commenced operations on 3 April 2017, a combination of actual fund returns and market index returns were used to determine the risk indicator. Therefore, it may provide a less reliable indicator of potential future volatility. For the five-year period ending 30 June 2018, market index returns have been used to 2 April 2017 with actual fund returns used for the balance of the period.
