

For the quarter ended 30 September 2018

This fund update was first made publicly available on 29 October 2018

## CLARITY GLOBAL SHARES FUND

### What is the purpose of this update?

This document tells you how the Clarity Global Shares Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Clarity Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The Fund aims to achieve returns over the medium to long term by investing in a portfolio of well-diversified global securities listed on sharemarkets around the world.

These assets may include listed equities, exchange traded funds, currency positions and cash.

Total value of the fund	\$108,571,734
Date the fund started	3 April 2017

### What are the risks of investing?

Risk indicator for the Clarity Global Shares Fund<sup>1</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 30 September 2018. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

### How has the fund performed?

	Past Year
Annual Fund Return (after deduction for fund charges and tax)	13.88%
Annual Fund Return (after deduction for fund charges but before tax)	14.16%
Market index annual return (reflects no deduction for charges and tax)	16.22%

The market index annual return reflects the return for the MSCI All Country World ex-Tobacco Index (net dividends reinvested), measured in NZ dollars, 50% hedged to NZ dollars benchmark index. Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

### What fees are investors charged?

Investors in the Clarity Global Shares Fund are charged fund charges. In the year to 31 March 2018 these were:

	% of Net Asset Value
Total Fund Charges (incl GST)	1.06%
Comprising management and administration charges which are made up of:	
Manager's basic fee	0.66%
Other management and administration charges	0.40%

There are no performance fees charged in relation to the Clarity Global Shares Fund.

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about those fees.

### Example of how this applies to an investor

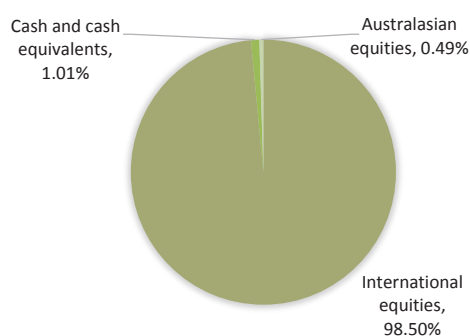

Small differences in fees and charges can have a big impact on your investment over the long term.

Chris had \$10,000 in the Clarity Global Shares Fund at the start of the year and did not make any further contributions. At the end of the year, Chris received a return after fund charges were deducted of \$1416 (that is 14.16% of his initial \$10,000). Chris does not pay any other charges. This gives Chris a total return after tax of \$1388 for the year.

### Further information

You can also obtain this information, the PDS for the Clarity Funds, and some additional information from the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

### Notes

- As the Fund commenced operations on 3 April 2017, a combination of actual fund returns and market index returns were used to determine the risk indicator. Therefore, it may provide a less reliable indicator of potential future volatility. For the five-year period ending 30 September 2018, market index returns have been used to 2 April 2017 with actual fund returns used for the balance of the period.
