What are the risks of investing?

Risk indicator for the Clarity Fixed Income Fund

Lower expected returns — Higher expected returns

1	2	**3**	4	5	6	7

Lower risk — Higher risk

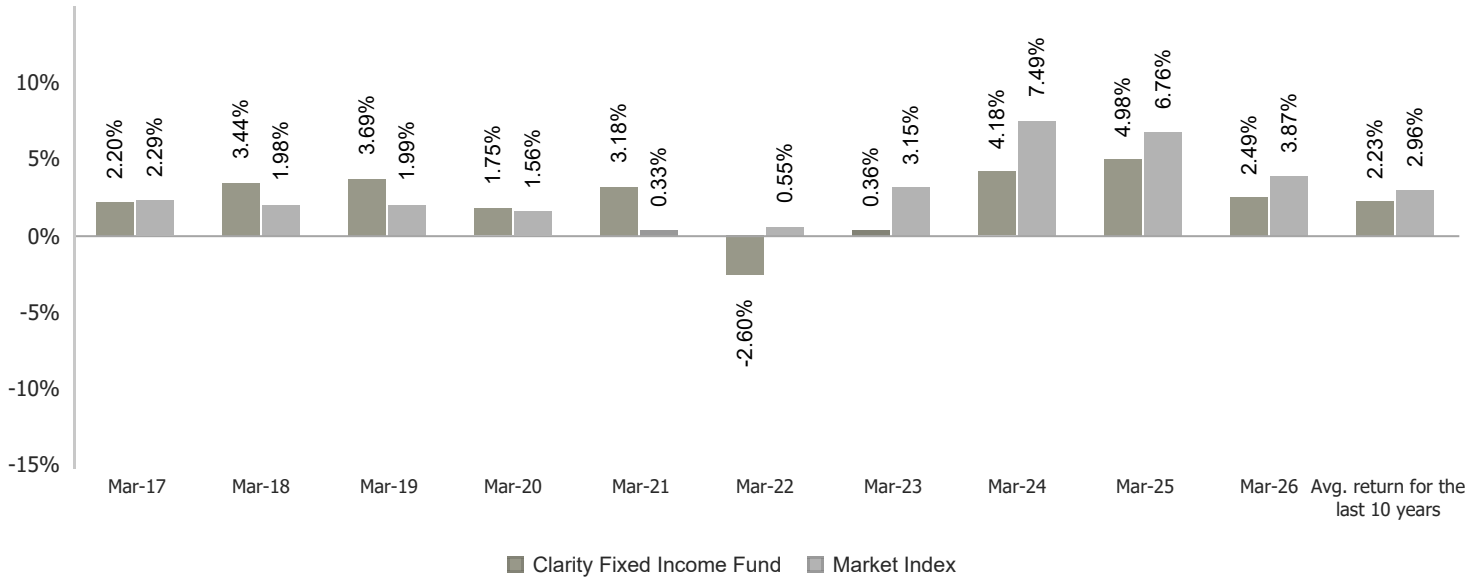

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.
To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter
Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.
This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.
See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.
